Comments - slide one

Daniel Santos   Dec 07 2018:

the .js will work with $jquery - studying the best way.

Daniel Santos   Dec 07 2018:

the css {} will determine the container width and general styling - where the controllers will be positioned, etc.

Daniel Santos   Dec 07 2018:

basically the html will have a div -container that "contains" three section = three slides.

Daniel Santos   Dec 07 2018:

```
<html>
<div class="container">
<section></section>
<section></section>
<section></section>
</div>
```
